Competency Assessment and Safety & Compliance Program

Your laboratory's license for Competency Assessment Program is based on the number of individuals who will be using Competency Assessment Program—that is, the number of people for whom you will be assessing competency, not the number of employees in your laboratory. The Safety & Compliance course package is an addition to your Competency Assessment Program order. The same employees enrolled in Competency Assessment Program will have access to Safety & Compliance courses if the additional fee is paid.

Refer to pages 15–17 of the Surveys catalog for program information.
